

ONslow MEMORIAL REHABILITATION CLINIC

Onslow Memorial offers skilled therapy in coordinated care. Our multidisciplinary setting allows therapists to work together to provide the best plan of care for you. We treat adults and children of all ages.

THERAPIES

Physical Therapy

Physical Therapists work on coordination, tone, balance or large motor movements. Our therapists have experience in treating patients with orthopedic conditions, joint replacements, neurological and general medical issues.

Occupational Therapy

Occupational Therapists work to address orthopedic conditions or neurological issues, and provide general medical rehabilitation and treatment for improving, self care, fine motor or visuo-perceptual skills. Hand and upper extremity therapies and splinting services are available.

Speech Language Pathology

Speech Pathologists work with patients with speech, language, communication, or swallowing impairments. Our therapists have extensive experience in medical speech therapy, including experience in treating brain injuries.

SPECIALTY PROGRAMS

Pulmonary Rehab Therapy

Assists people in managing chronic respiratory disease to improve their independence.

Lymphedema

Helps to improve swelling from lymphedema.
Certified specialist develops individualized plan.

Vestibular Rehab

Vestibular therapists assess and treat balance problems and dizziness.

Pelvic Floor Therapy

Our pelvic floor therapists assess and treat a variety of pelvic floor conditions.

TMD or TMJ (Temporomandibular Joint Dysfunction)

TMD therapists work with people who have jaw pain/dysfunction. Often ordered by dentists & MDs.

Dysphagia & Feeding Therapy

Speech Therapy program to help adults & children with difficulty eating/swallowing. VitalStim/NMES therapy provided for adult if appropriate.

AAC Program

Our Alternative and Augmentative Communication program helps select speech generating devices for children or adults with severe speech and language problems.

Low Vision

Therapists assess and help patients to compensate for vision loss.

Sports Rehabilitation

Program focuses on rehabilitation of sports injuries and athletes (adults and children).

HOW TO MAKE AN APPOINTMENT:

To schedule an appointment, we will need a physician's order.

After obtaining an order, you or your physician can call us to schedule an evaluation.

WHAT TO EXPECT

After the evaluation, your therapist(s) will develop an individual plan of care to help with any identified areas of need.

We provide longer, 45 minute, sessions to achieve quality outcomes.

Patients coming for multiple therapies can have these scheduled on the same day.
