

NURSING OPPORTUNITIES

EMERGENCY DEPARTMENT

Ready for Anything, Prepared for Everything, Surprised by Nothing. Our 41-Bed Emergency Department has a Level 1 Rapid Infuser, 2 fully inclusive resuscitation rooms. We treat patients with anything from the common cold to cardiac arrest. Work with a dynamic team of Physicians, Advanced Practice Providers, RN's, LPN's, PCT's and Clinical Secretaries.

INTENSIVE CARE UNIT (ICU)

Our 12-bed ICU is staffed with a team of RN's, PCT's, Unit Secretaries and Providers. The ICU staff are house wide code Responders and part of the Rapid Response Team. Our patient population includes, but is not limited to: Renal Failure, Shock, Overdose, ETOH Withdrawal, Pulmonary Edema, Sepsis, Acute Renal Failure, Acute O.B. for stabilization and post-surgical patients needing critical intervention.

INTERMEDIATE CARE UNIT (IMCU)

IMCU is a 37-bed acute care unit. Diagnoses include: Stroke, Sepsis, Diabetes, CHF, COPD, Renal Failure, etc. Additional skills include: stable vent management, hemodynamic drip titration, arterial blood gas collection, elective cardioversion, peritoneal dialysis, and much more! New Graduates welcome with no residency or contract!

WOMEN'S AND CHILDREN'S

Develop your passion for nursing and be a special part in the lives of our patients and their families. We have the variety you may be looking for. Explore your interest for Maternal, Pediatric and adult nursing all on ONE unit. 10-bed Labor and Delivery Unit plus OR/Recovery Room exposure.

- 18-bed Post-Partum, Antepartum and Gynecology.
- 30-bed Well Baby Nursery to include 4-level II beds and 4 level III beds.
- 12-bed Pediatric/Medial Surgical Unit.
- 2-OR Labor and Delivery Rooms

MED SURG TELEMETRY

Come join us! Challenge yourself and your new skill set to become the best nurse you can. Our patient population includes, Cardiac, Diabetes, CHF, COPD, Renal, General Surgery and Orthopedics to name a few. Our team consist of RNs, LPNs, PCTs, CNA/US and unit secretaries. Experience it all on our 47-bed Med-Surg Telemetry unit! New Graduates are welcome with no residency or contract!

FLOAT POOL

Unable to decide on just one unit? Our Float Pool is for you! You will choose a minimum of two distinct units to float between. This positions gives you the option to experience all areas of nursing! Candidate must have one year of relevant hospital experience to be qualified! Float Pool staff are also expected to float outside their distinct units based on the organization needs.

SURGICAL SERVICES

Surgical Services is a team-based entity with emphasis on delivering patient satisfaction and patient safety. All of our areas work together to ensure patients have a positive experience during their stay at Onslow Memorial Hospital. We put the latest surgical technology and equipment in the hands of board-certified surgeons and experienced nurses.

The Ambulatory Surgery Unit (ASU) is a 9 bed unit which provides pre and post care to our surgery patients. Our goal is to properly prepare and recover surgical patients so they may be safely discharged home. We match our surgical expertise with exceptional patient care to enhance your recovery.

The Post Anesthesia Care Unit (PACU) is a highly-skilled 8 bay unit. Patients are transported immediately after surgery to PACU to be monitored on a 1 nurse to 1 patient ratio. We manage patient airways, pain levels, vital signs, and all other post-surgical needs before transporting the patient back to ASU or one of our nursing units for continued observation.

The Endoscopy Unit (EU) consists of 3 procedure rooms with 8 pre and post care bays. EU provides robust services such as colonoscopies, EGD's, ERCP's, bronchoscopies, and manometers. We provide anesthesia services for monitored anesthesia care to provide positive outcomes for their patients.

The Operating Room (OR) has 4 operating suites, and 1 cystoscopy room. Our team provides a wide range of services to include General, GYN, Ortho, ENT, Spine, and Plastics. Our highly skilled nurses and techs provide exceptional care during surgery. We provide strict adherence to sterile technique to reduce surgical site infections.
